

PeopleSoft Supply Chain Management SIG Meeting

Session ID: 100560

Prepared by:

Dianne Taylor
Asset Management & Distribution - Systems Support
Savannah River Site
Dianne.Taylor@srs.gov

Agenda

- Introduction to the SCM SIG
- Tips for the Conference
- SCM Planning Solutions for PeopleSoft
- Wrap-up

PeopleSoft

RECONNECT

#PSRECONNECT

Welcome to Rosemont

PeopleSoft

RECONNECT

#PSRECONNECT

What is the SCM SIG?

The PeopleSoft Supply Chain Management Special Interest Group is a product-specific users' group comprised of all PeopleSoft Enterprise customers that have licensed PeopleSoft Supply Chain products.

PeopleSoft

RECONNECT

#PSRECONNECT

Key SCM Business Processes

- Order to Invoice
 - Order Management
 - Enterprise Pricer
 - Billing
- Plan to Produce
 - Planning
 - Manufacturing
- Inventory Management
 - Fulfillment
 - Receiving/Putaway
 - Replenishment

SCM SIG Value Proposition

- Information specific to all users of PeopleSoft Supply Chain modules
- Networking
 - Other Enterprise customers & Oracle Strategy
 - Assist in leveraging current release
 - Upgrade planning
 - Integration of Non-PeopleSoft solutions
- Common voice to Oracle on current and future releases

PeopleSoft

RECONNECT

#PSRECONNECT

Getting the Most From RECONNECT

- Review the Agenda – find those sessions of greatest interest to you
- Visit Partners in the Showcase – their support helps make this event possible
- Network with others – sharing ideas and experiences with your peers
- See if you can come up with 3 new things that you can try when you get back to your office

PeopleSoft

RECONNECT

#PSRECONNECT

Key SCM Sessions at RECONNECT

Session ID	Title	Day	Time	Location
100650	PeopleSoft Global SCM Inventory Implementation at ACN Opportunity, LLC.	Wednesday	8:00am	Gatwick
102680	Configuring the Cost Balancing Work Center	Wednesday	1:30pm	Gatwick
101000	PeopleSoft Mobile Inventory Management - Not Just for Healthcare Anymore!	Wednesday	4:30pm	Paris
102830	Inventory Checklists, Work Centers, and Reports (Oh My)	Thursday	1:45pm	DaVinci AB
101440	PeopleSoft Supply Chain Management - Open Discussion	Thursday	9:15am	DaVinci AB

Quest
International Users Group

Achieve Best-In-Class Performance

Our mission is to provide innovative, configurable, flexible, cost-effective solutions to common business challenges, enabling our clients to save time, increase productivity, minimize costs, and maximize their return on investment.

Solutions

Business applications that offer organizations an end-to-end solution providing the right design and implementation from start to finish.

Services

A 24/7 seasoned and experienced staff of experts to help you implement your business solutions efficiently and effectively at a cost-effective rate.

Cloud

Cloud applications provide solutions built on proven enterprise class architecture that enable high configurability and ease of monitoring.

About
Smart ERP Solutions, Inc

Partnering with AVATA to provide Best-In-Class SCM solutions for PeopleSoft ERP Users.

Overview of Peoplesoft SCM Planning

- Demand Planning: Tools for the forecasting of sales and use of products and items. Allows for the publishing of forecasts for use by PeopleSoft applications to balance inventory investment against customer service levels.
- Allows the establishment of a balance between investments in safety stock, customer service levels, and operational efficiency while taking into account factors such as order quantities, cost of processing an order, and inventory carrying costs.
- Allows optimization of procurement, distribution, and production resources to ensure that there is sufficient inventory available to fulfill demand.

PeopleSoft Planning Support

- Demand Planning – Not supported after release 9.0
- Inventory Policy Planning – Not supported after release 9.1
- Supply Planning – Premier Support available through March 2018. After that, normal policies on Extended and Sustaining Support apply
- What does this mean for users of these applications?

Option 1 – Continue as Always

- Existing applications can still be used although not fully supported.
- Known bugs can be remedied with existing fixes, but no new fixes will be created.
- Possibility that changes in related applications may “break” the planning modules. Oracle will not test or modify them for changes made in applications such as Inventory or Purchasing.
- No enhancements will ever be made – modules work as they currently exist
- These modules are likely not viable for those companies that do not already own them.

Option 2 – Other Applications

- Oracle provides other applications that can replace the retired PeopleSoft modules
- In some cases, these alternatives are more robust and have greater functionality than the PeopleSoft equivalents.
- There is limited out-of-the-box for Demantra Demand Planning to PeopleSoft starting with Release 9.1. Beyond that, custom integration is required.

Strategy Considerations

- Is your company satisfied with the functionality of the existing Planning modules?
- Are you looking to expand your Planning footprint?
- Is your Planning environment stable?
- What are your plans for staying current as new PeopleSoft Product Images are released?
- What is the level of comfort that your technical staff in supporting these applications?
- Do you have plans to try to move parts of your ERP environment to the cloud?
- Does your organization have IT policies regarding vendor support on key software applications that must be followed?

Demantra

- “Best in class” sales forecasting, demand planning and sales & operations planning solution
 - Scalable, and integrates to PeopleSoft, CRM, Hyperion, ASCP....anything
- Highly configurable solution – personalize without customize
 - Self-service worksheets, analysis and graphing capabilities
 - Collaboration platform (Consensus Forecast): workbench, tasks, approvals, notes, workflows
 - Exception-driven management: filters, attributes, exceptions, alerts
 - “Slice and Dice” flexibility
- Web-based tool accessible remotely and offline mode
- Built in forecast metrics
- Excel integration
- Role based security
- Advanced statistical engine
 - NPI-Chaining, attribute-based forecasting, and shape modeling

Best in class statistical forecasting

Self-Tuning Forecasting Engine

- **Bayesian mix modeling – superior to best fit**
- **15 model library**
 - Auto-regressive moving average (ARMA)
 - Regression integrated winters
 - Logistic and logarithmic models
 - Ridge regression, Markov chain regression
 - Intermittent regression
- **Unlimited causal factors**
 - Seasonality, weather, market indicators
 - Base + price + multi-event lift decomposition
- Promotion effects
 - Cross-product and cross-location effects
 - Pre and post event
- Automatic outlier detection
- Trend long, short, dampening
- Missing data interpolation
- Shape modeling and auto-correction
- Regime change
- Fit and forecast validation

Demand Management	Advanced Forecasting Demand Modeling	Real Time Sales & Operations Planning
<ul style="list-style-type: none"> • Generate independent forecasts for all items • Aggregate the forecast within the product, geography and time hierarchy • New product introductions – <u>history model</u> • Calculate the planning percentages for dependent items • Manually enter a new forecast quantity at the Product Family/World Wide/quarterly level and allocate that forecast down through the product, geography and time • Standard plan exceptions and alerts • View standard reports • Standard collaboration capabilities to share plan information between planners • Forecast Methods <ul style="list-style-type: none"> – Auto and Linear Regression (ARX) – Integrated Causal Exponential Model (BWINT) – Multiplicative Monte Carlo Regression (CMREG) – Combined Transformation Model (ELOG) – Croston for Intermittent (FCROST) – Holt (HOLT) – Regression for Intermittent (IREGR) – Transformation Model (LOG) – Regression (REGR) 	<ul style="list-style-type: none"> • Nodal tuning of forecast parameters • Different forecast method based on part type • Attribute based forecasting • New product introductions – <u>statistical model</u> • End of Life modeling • Cannibalization/Substitution • Unlimited casual factors • Six additional forecast algorithms <ul style="list-style-type: none"> – Integrated Auto and Linear Regression – Auto Regressive Logistic – Dual Multiplicative Linear Regression – Monte Carlo Regression for Intermittent – Logistic – Modified Ridge Regression 	<ul style="list-style-type: none"> • Cross functional collaboration <ul style="list-style-type: none"> – Sales, Marketing, Finance, Operations – Workflow, Alerts, Exceptions • Integrating additional data from external systems <ul style="list-style-type: none"> – Customer forecasts – Capacity – Supply – Cost – Price – Budgeting • Supply side integration to ASCP • Budgeting integration - Hyperion • Customer collaboration

Advanced Supply Chain Planning

ASCP is a single, multi-purpose supply planning solution:

- Distribution & Manufacturing Sourcing
- Capacity Plan
- Master Schedule
- Procurement Plan
- Supplier Sourcing Strategy
- Mfg., Supplier, In-transit Lead-times

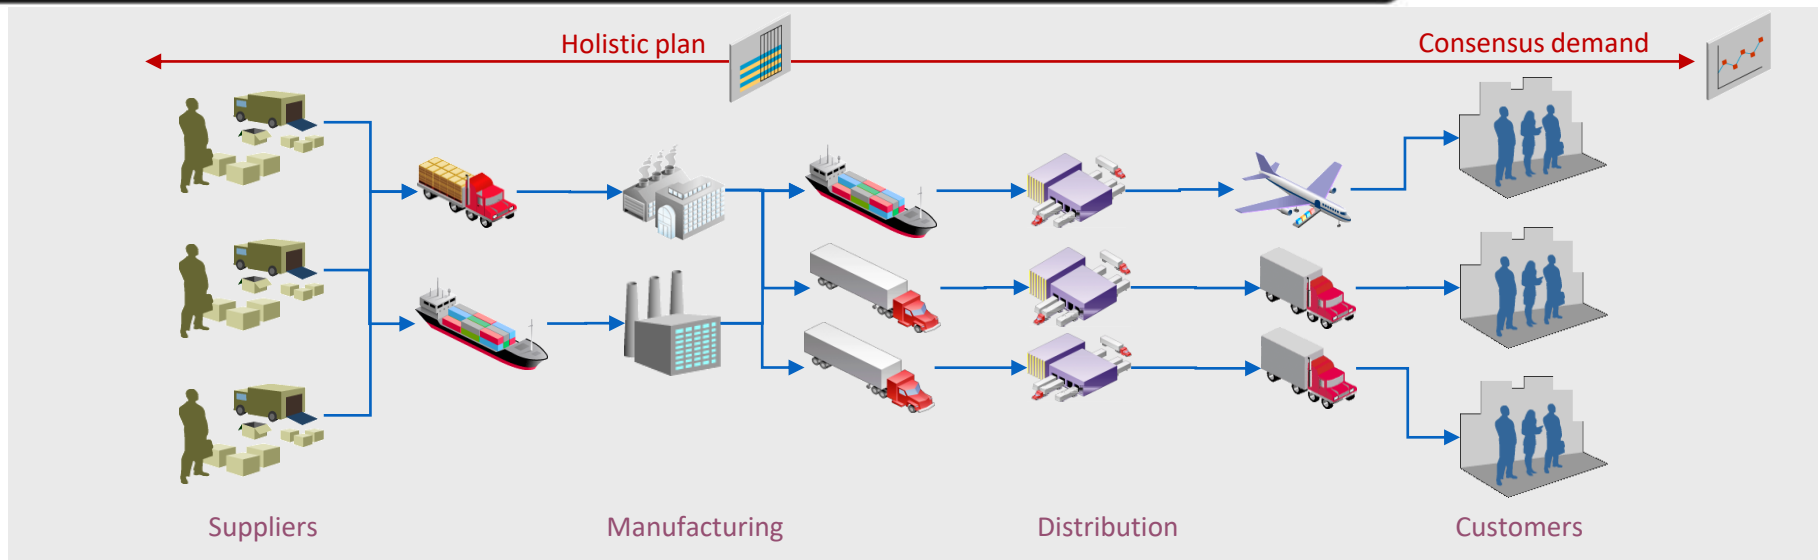

PeopleSoft

RECONNECT

#PSRECONNECT

Synchronize fewer plans across the enterprise

One solution for supply chain, distribution, and manufacturing planning

- Reduce planning cycle time by reducing the number of plans required
- Plan all distribution, manufacturing, and supply chain activities in one plan
- Drive the plan directly from your approved sales and operations plan
- Drive decisions directly into execution
- Reduce the time from a change in market demand to executing

PeopleSoft

RECONNECT

#PSRECONNECT

Flexible plan granularity

A single plan for long-term, tactical, and short-term planning

Single plan

Short Term

- Scheduling complexities
- Minute/Hour level
- Resource instances
- Constrained

Mid Term

- Products
- Day level
- Resources
- Supplier capacity
- Constrained

Long Term

- Product families and Products
- Period level
- Aggregate resources, Critical components
- Unconstrained

- Plan more rapidly
 - All time horizons
 - Flexible granularity: Time, Product, Resource
- Selectively apply constraints across time
 - Resource, supplier capacity, sequence dependent setups
- Plan all or only critical components and resources

Start Date	Days	Weeks	Periods
23-JAN-2007	90	13	6

PeopleSoft

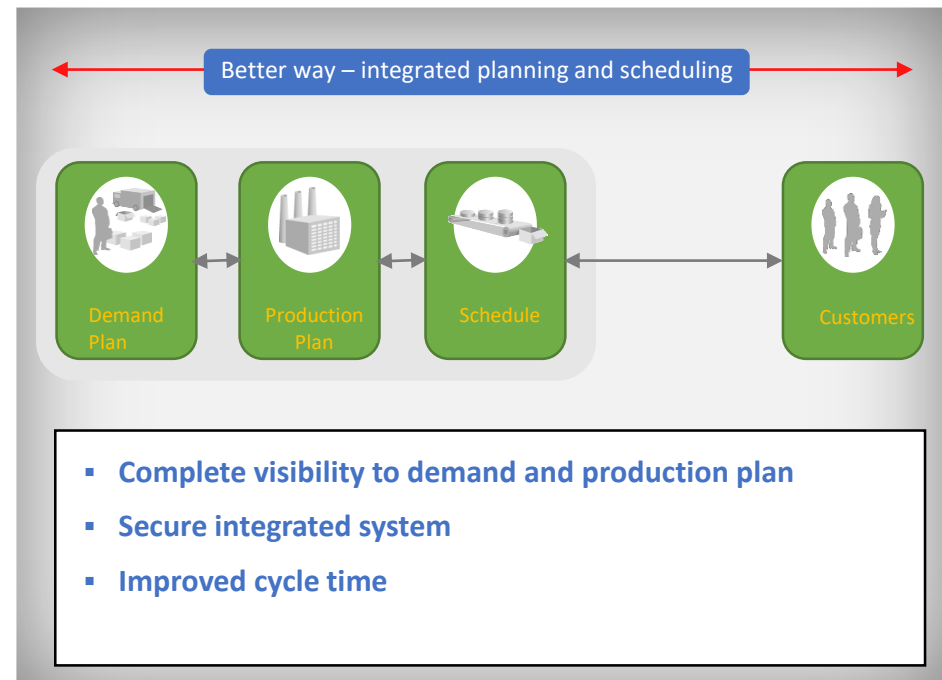

RECONNECT

#PSRECONNECT

Oracle Production Scheduling

Feasible on-time schedules with improved throughput and utilization

- Feasible schedules that respect manufacturing constraints
- Improved throughput and minimized sequence dependent setups
- Fast planning cycle times and ability to run what-if scenarios
- Improved schedule adherence and delivery performance
- Reduced work in process inventories
- Secure and integrated system

PeopleSoft

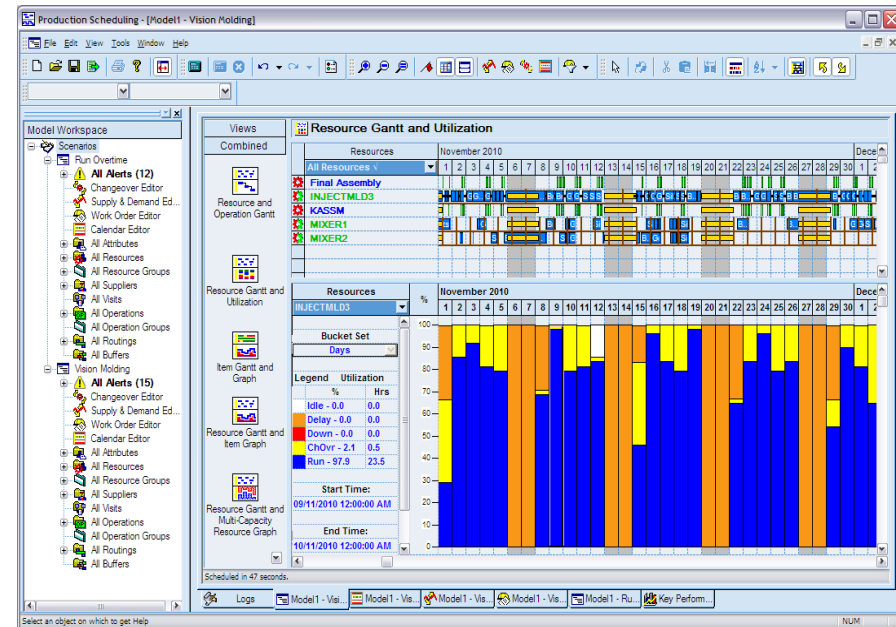

RECONNECT

#PSRECONNECT

PS: improve factory throughput

Easily create feasible schedules

- Determine a feasible schedule considering all your constraints
 - Schedule and synchronize multiple stages of production
 - Automatically detect floating bottlenecks
 - Consider all material and resource constraints
 - Consider make-pack synchronization
- Easily identify issues
 - Exceptions highlight constraints
 - Drilldown directly to root causes

PeopleSoft

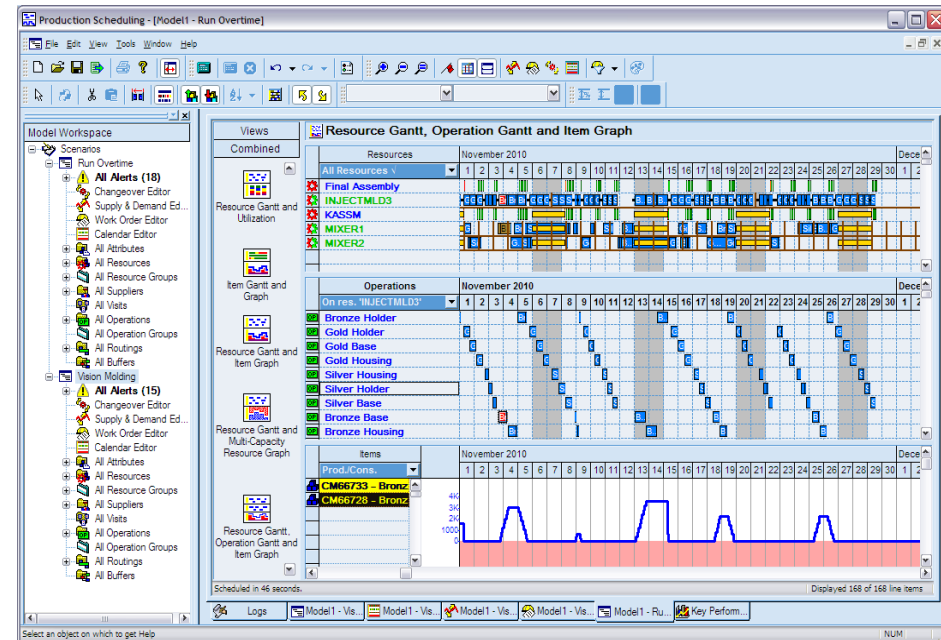

RECONNECT

#PSRECONNECT

PS: maximize resource utilization

Minimize lost utilization due to setup time

- Minimize setup time
 - Intelligent sequencing to minimize major and minor setups
 - User defined ideal sequence can be specified
 - Create and review schedules by manufacturing stage
- Run optimization
 - Plan for campaigns to optimize setup while respecting minimum run constraints
 - Weigh on-time performance versus setup costs versus carrying costs

Demand Management Cloud

- Improve demand visibility
- Manage multiple demand signals
- Analyze demand
- Leverage Microsoft Excel
- Capture Business Insights
- Oracle Social Networking

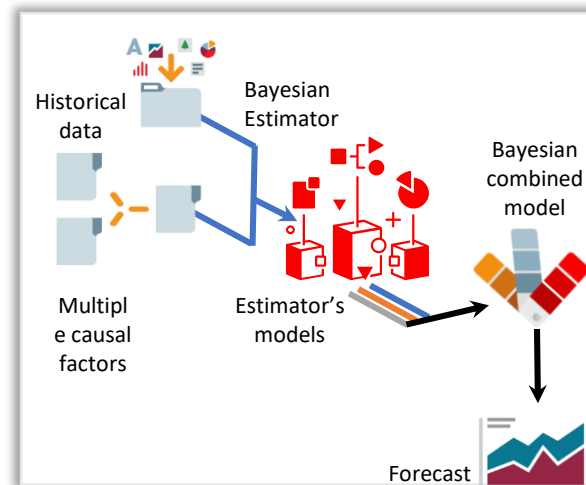

The screenshot displays a detailed data table within the Oracle Demand Management Cloud interface. The table is titled "Laptop and Tablet Demand Plan" and shows "Sales vs Shipments Forecast Analysis". It includes columns for various time periods (12/26/16, 1/2/17, 1/9/17, 1/16/17, 1/23/17, 1/30/17, 2/6/17, 2/13/17, 2/20/17, 2/27/17, 3/6/17, 3/13/17) and rows for different business units and products. The table contains numerical data for "Shipments History", "Adjusted Shipments History", "Final Shipments History", "Shipments Forecast", "Adjusted Shipments Forecast", and "Final Shipments Forecast". A context menu is visible over the table, offering options like "Override Scale", "Edit", "Create Note", and "Manage Notes".

		12/26/16	1/2/17	1/9/17	1/16/17	1/23/17	1/30/17	2/6/17	2/13/17	2/20/17	2/27/17	3/6/17	3/13/17

	Final Shipments Forecast				772	773	1,507	777					
	Sales Forecast	833	1,022	988	892	1,009	1,156	1,258	1,260	1,257	1,086	1,078	1,049
AS3002 Business Corp	Shipments History	328											
	Adjusted Shipments History												
	Final Shipments History	328											

Demand Management Cloud

- Uses advanced machine learning algorithms
- Multiple statistical models and Bayesian information theory
- Robustness of models tested using Markov Chain methods
- Model mixing using Bayesian information Criteria
- Automatically tuned

- Multiple models analyzing for linear, non-linear, auto-regressive factors
- Addresses intermittency, co-linearity, outliers, level shifts, short and long trend components
- Captures seasonality, trend, holidays, events, price effects
- Incorporates new data streams as possible inputs

Demand Management Cloud

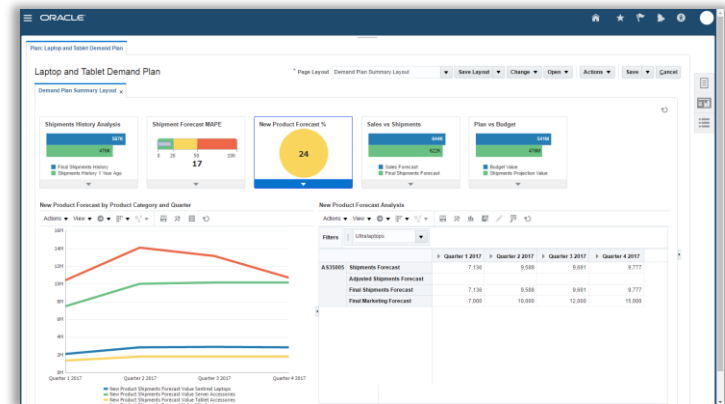

• Forecast Configure-to-Order Products

- Incorporate customer preferences into product-mix by using attach rates to derive options forecast for models
- Analyze and visualize forecast of both models and options simultaneously using out-of-the-box reports
- Improve customer service levels by simulating impact of changes to attach rates or forecast of model and options

	June 2016						
	Shipments Forecast	Adjusted Shipments Forecast	Final Shipments Forecast	Adjusted Planning Percentage	Final Planning Percentage	Final Option Demand Forecast	Option Demand Forecast
Tablet X	4,356.978	6,500	6,500.0				
Color					0.912	5,928.488	5,928.488
Blue					0.25	1,482.122	1,482.122
White					0.922	5,467.318	5,467.318
Storage					0.916	5,957.042	5,957.042
256GB					0.774	4,608.113	4,608.113
64GB					0.771	4,593.764	4,593.764

• Forecast New Products

- Forecast new products by learning behavior from similar products and making volume adjustments
- Manage new product launches by introducing them to new channels, customers and geographies
- Improve new product forecast accuracy by reconciling marketing forecasts, and incorporating executive feedback

Demand Planning Comparison

Oracle Supply Planning Cloud

Improve Service Levels

- Balance demand and supply across multiple levels of supply chain
- Plan safety stock
- Plan for multiple fulfillment strategies

Plan

Prioritize Problem Areas

- Get an "At a Glance" summary of Plan Health
- Diagnose root cause for exceptions
- Analyze plan using metrics most meaningful for your business

Monitor

Make Better Decisions

- Make what-if changes to supply chain and evaluate effectiveness
- Implement changes that have the greatest impact and release for execution

Respond

Improve Supply Chain Flexibility

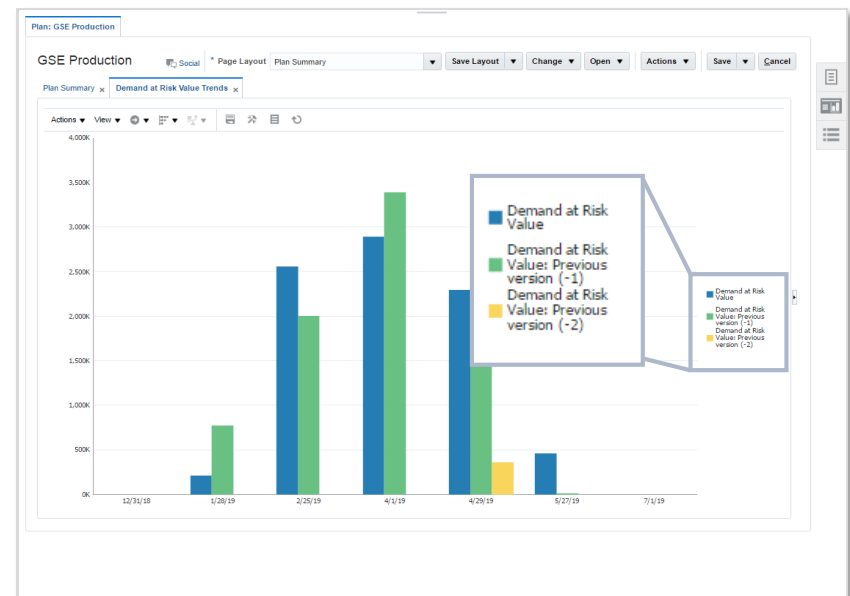

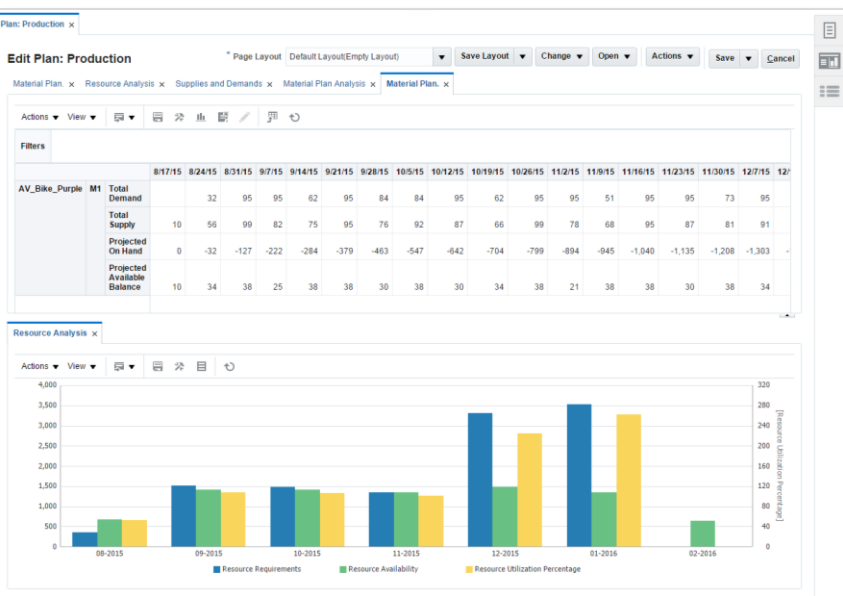

- Implement a flexible supply chain: Plan for multiple manufacturing and fulfillment strategies
 - Configure to Order: Plan for ATO model, Automate planning for configured sales orders and options
 - Contract Manufacturing & Outside Processing: Plan external manufacturing with configurable degree of visibility & control
 - Drop Ship: Reduce lead-times, Plan for drop ship of products

Plan across a Multi-tier Supply Chain in Real Time

Balance Demand and Supply

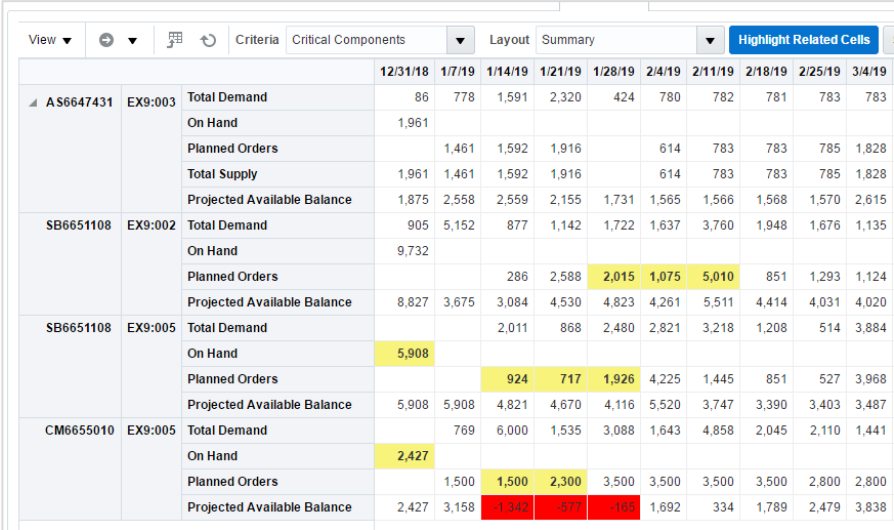

Plan Material and Capacity across a multi-level supply chain

Understand trends in demand and supply

Identify and Prioritize Issues

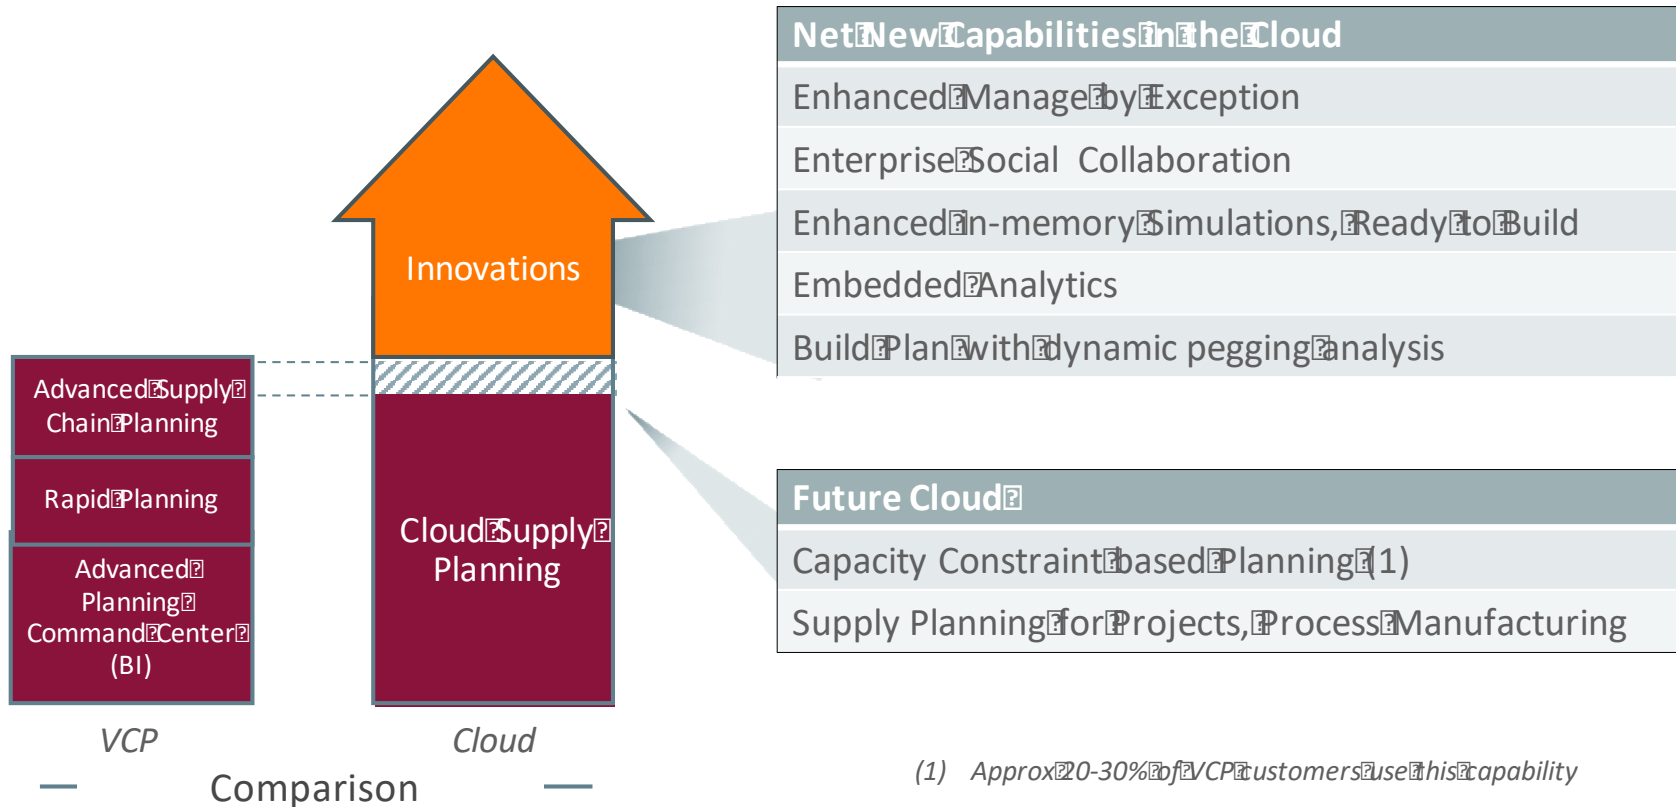

- Improve planner productivity by providing the information needed to make better decisions
 - Identify and be alerted to issues most important to your business
- Quickly access the most critical data
- Shorten decision making time through collaboration and track accountability
 - Collaborate using Oracle Social Network and Planner notes

The screenshot displays the Oracle Planning interface, specifically the 'Critical Components' tab. The table shows data for four components: AS6647431, SB6651108, SB6651108, and CM6655010, each with a corresponding EX9:003, EX9:002, EX9:005, and EX9:005. The metrics include Total Demand, On Hand, Planned Orders, Total Supply, and Projected Available Balance, tracked from 12/31/18 to 3/4/19. The interface includes a 'View' dropdown, a 'Criteria' dropdown, and a 'Layout' dropdown. A 'Highlight Related Cells' button is visible in the top right corner.

			12/31/18	1/7/19	1/14/19	1/21/19	1/28/19	2/4/19	2/11/19	2/18/19	2/25/19	3/4/19

Supply Chain

Global distribution (air, rail,
freight), multiple & diverse
business units, manufacturing
facilities around the world,
2800 employees worldwide

Implementation Partner

AVATA, Inc.

Top Objectives and Challenges

- Manually disconnected Supply Chain planning processes
- Inefficient processes impacting inventory levels and customer service levels
- Continuous company growth with demand exceeding supply
- Long planning cycles because of complex supply planning constraints
- Standardized Supply Chain planning process across all business units
- Improve Demand Planning and Constraint Supply Planning
- Global Sales & Operations Planning

Solution and Products

- Demantra Demand Management (DM), Demantra S&OP (RTS&OP), Advanced Supply Chain Planning (ASCP), Constraint Based Optimization (CBO), Advanced Planning Command Center (APCC)
- Integrated with Oracle PeopleSoft

Results

- Standardized and integrated cross functional Supply Chain processes
- Worldwide Sales & Operations Planning processes
- Global software platform for demand and supply
- Monthly/weekly/daily planning cycles (previously only monthly)
- Ability to react to demand fluctuations
- Constraint based supply planning
- What-if scenarios for different planning cycles
- Exception management to improve planners efficiencies

- **Global Standardized Supply Chain Planning Processes**
- **Reduced Planning Cycle Times**
- **Increased Forecast Accuracy**
- **Constraint Based Supply Planning**

“With our global planning platform and standard business process, Rogers is now set up for future growth.”

*Michael Jenkins, Dir. Supply Chain
Planning and Processes*
